

High Pressure JP004 4" Pump

APPLICATIONS:

MWI's high pressure jet pumps make short work of gravel washing, drilling, pipeline testing, equipment cleaning, piling and wellpoint jetting, as well as any other high pressure applications.

Construction

Wellpoint

Jet Pumping

Remediation

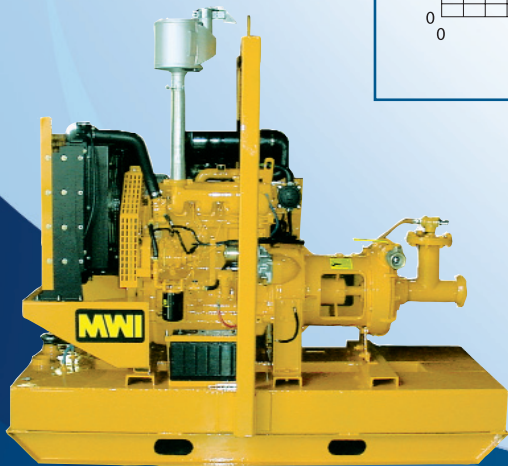

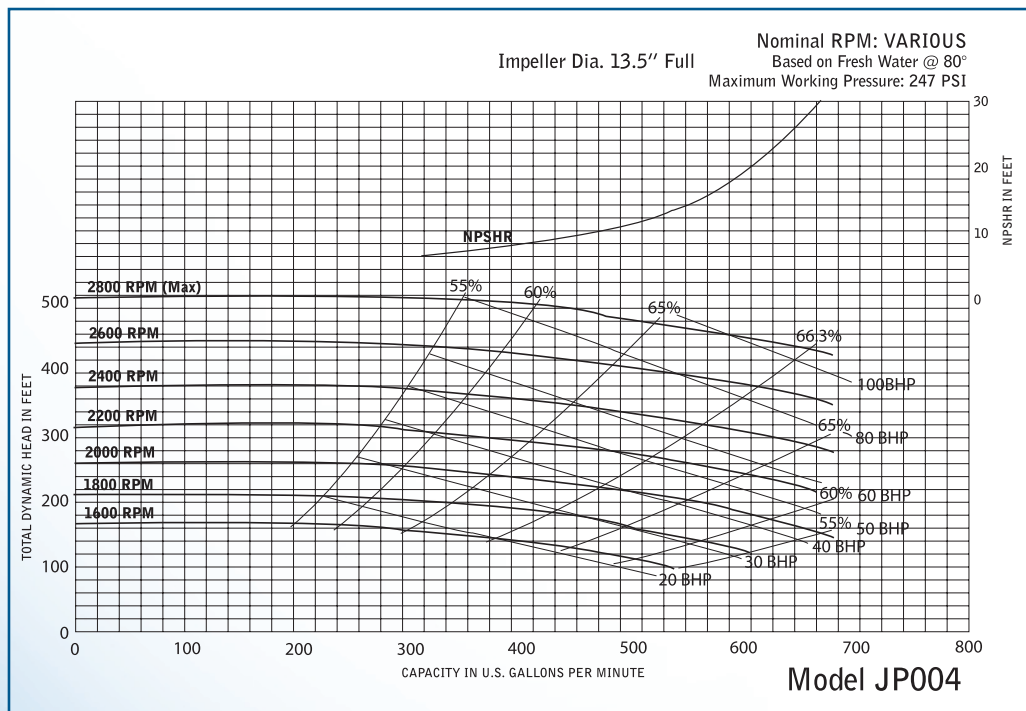

Recharge

Multiple Fluid Transfer

Capabilities

Pigging

These heavy-duty pumps can handle your toughest jetting job with flows to 4000 gpm and pressures to 220 psi. The units are complete and ready to operate in either skid or portable configurations with an open industrial power unit, integral fuel tank, lifting bail, control panel and hand or compressor-driven priming systems.
